About Me

I am a BE graduate from Bharathidasan Engineering College with a passion for Full Stack Development. I recently completed a six-month role as a Front End Developer at Tech Storey Private Limited, gaining hands-on experience with React JS. During my academic tenure, I worked on projects like 'Trap Music' and further enhanced my expertise through Full Stack Developer training at KodNest, Bangalore. I am eager to contribute my skills and enthusiasm to innovative web application development and am keen to explore new opportunities in the tech industry.

Education
